HVAC, Building Automation & Energy Efficiency Services – Maintenance, Repair and Replacements

Company Background

Founded in 1982, the Padgett Group provides comprehensive technical services that improve buildings HVAC performance, reliability and energy efficiency. Located in Canton, Georgia, the Padgett Group is privately (Veteran) owned and operated. Serving hundreds of customers throughout the state, we have established long-term client relationships with our commercial, industrial and institutional facilities clients through our proven performance and ability to reduce their overall cost of operation.

Capabilities Statement

(please also see other side)

The Padgett Group offers a suite of technical services that are tailored to meet and/or exceed the requirements of each client. Working closely with our customers, we develop programs designed to maximize the value of every dollar spent. The Building Assessment is conducted to establish a baseline of information to evaluate the clients operational and financial risks, performance and energy efficiency of their technical systems. Based on our findings we customize our service offerings by utilizing our in-house expertise, experience and resources to maximize the outcomes for each client.

Bartow County Sheriff's Office

Suite of Services

Building Assessment: Our Building Assessment provides a comprehensive analysis on the physical condition, operational status and energy efficiency of the technical systems. Padgett Group provides detailed recommendations regarding future issues including the operational and financial risk and/or liability.

Planned Maintenance: Padgett Group develops a customized Planned Maintenance program based on your operational and financial objectives, facility type, hours of operation, equipment type, and age. We rely on industry accepted standards and manufacturer recommendations to keep equipment operating at peak efficiency.

Building Automation: Padgett Group integrates smart building technologies and solutions to upgrade and modernize existing buildings. We assist to establish new standards of energy efficiency and sustainability, while providing a superior workplace environment. Our strategies are built on a holistic view of the building systems, operational requirements, available energy sources, as well as the available operating and capital expenses limitations.

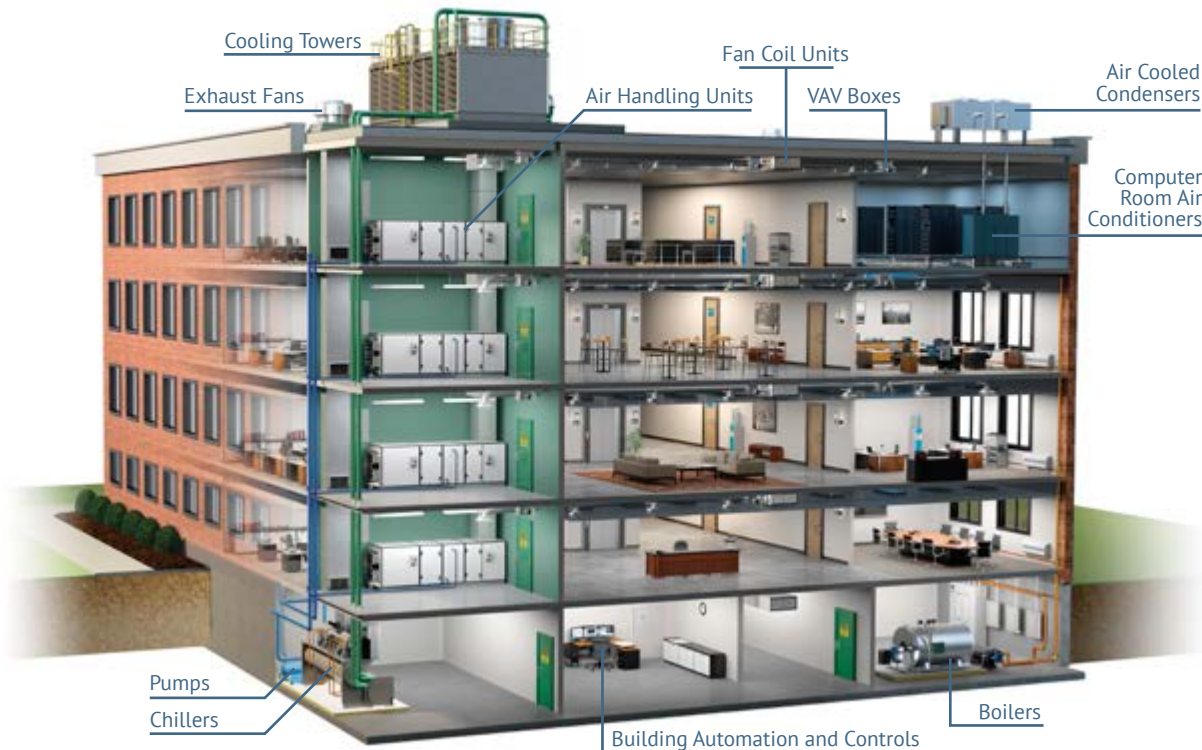

Energy Efficiency & Sustainability Services: Padgett Group specializes in smart energy and building solutions to reduce your energy consumption while providing the benefits of a healthier and more sustainable working environment. We convert your buildings energy data into actionable information by identifying low-cost/no-cost energy saving opportunities, evaluating equipment and technology upgrades, calculating returns on investment, and prioritizing selected measures.

Design-Build, Retrofit & Replacement Services: Padgett Group Design-Build, Retrofit & Replacement services offers a unique opportunity to streamline the process and reduce the cost of capital projects. Upgrading and retrofitting of existing facilities is very different than new construction. We provide the expertise to understand your current equipment, operational applications and new technologies to be integrated. Projects are completed with minimal disruption to your organization.
